INTERNET OF THINGS

ASSIGNMENT NO : 3

NAME : R.MANOJ

ASSIGNMENT QUESTION:

Write python code for blinking LED and Traffic lights for Raspberry pi.

SOFTWARE REQUIRED:

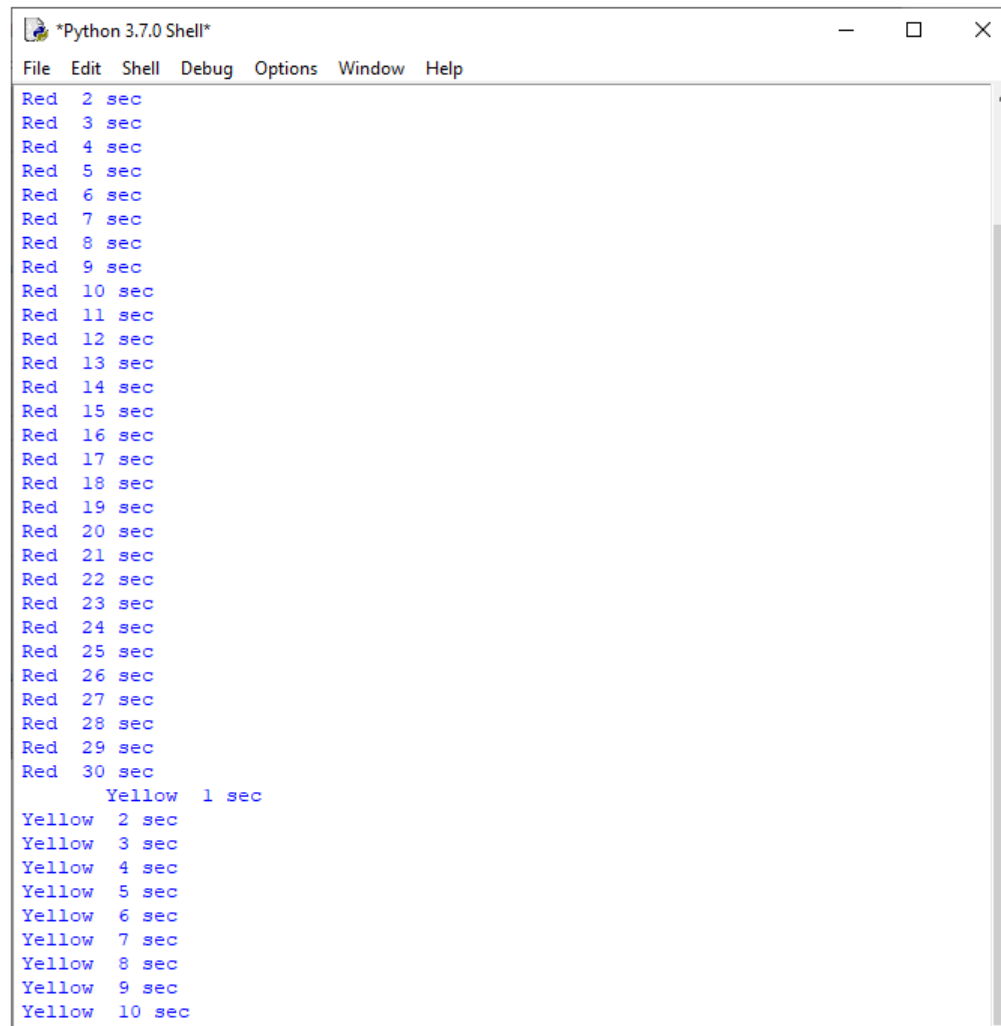

Python-3.7.0

PYTHON CODE:

```
import time i=1
while(True):
    if(i>0 and i<=30):
        for j in range(1,31):
            print("Red ",end="\n")
            time.sleep(0.5)
            i=i+1
        print(end="    ")
        print(end="\r")
    elif(i>30 and i<=60):
        for j in range(1,31):
            print("Yellow
",end="")
            print("{} sec".format(j),end="\n")
            i=i+1 time.sleep(0.5)
```

```
        print(end="    ")
        print(end="\r")
elif(i>60 and i<=90):
    for j in range(1,31):
        print("Green ",end="")
        print("{} sec".format(j),end="\n")
        i=i+1 time.sleep(0.5)
    i=1 print(end="
")
    print(end="\r")
```

OUTPUT:

A screenshot of a Python 3.7.0 Shell window. The window has a title bar with the text '*Python 3.7.0 Shell*' and standard window controls (minimize, maximize, close). Below the title bar is a menu bar with the following items: File, Edit, Shell, Debug, Options, Window, and Help. The main area of the window contains a list of status messages, each on a new line. The messages are color-coded: 'Red' for the first 30 lines and 'Yellow' for the last 10 lines. Each message consists of a color, a number, and the text 'sec'. The 'Red' messages range from 'Red 2 sec' to 'Red 30 sec'. The 'Yellow' messages range from 'Yellow 1 sec' to 'Yellow 10 sec'. The messages are arranged in two columns: the first column contains 'Red 2 sec' through 'Red 29 sec', and the second column contains 'Red 30 sec' through 'Yellow 10 sec'.
